

Zaina Abdulrahman Alaidarous

Jeddah, Saudi Arabia | +966 558681068 | Zaina.Alaidarous@gmail.com | [LinkedIn](#)

Information Technology graduate specializing in Database Systems with hands-on experience in enterprise systems development, database management, workflow automation, and UI/UX design. Experienced in developing and enhancing business applications, analyzing requirements, optimizing processes, and supporting digital transformation initiatives. Skilled in ASP.NET MVC, SQL Server, Power Automate, Power BI, and modern web technologies, with a strong interest in software development, data-driven solutions, and business process improvement.

Education

King Abdulaziz University — Jeddah, Saudi Arabia
Bachelor of Information Technology – Database Track
2020 – 2025
GPA: 4.69 / 5.0

Technical Skills

Programming Languages C#, Java, Python, JavaScript, PHP
Web Development ASP.NET MVC, HTML, CSS, Bootstrap
Database Technologies SQL Server, MySQL, Database Design, Database Management
Business & Automation Tools Power Automate, Power BI, Microsoft Office
Development Tools Azure DevOps, Git, Visual Studio
UI/UX Design Figma, Adobe XD, Wireframing, Prototyping
Core Competencies Workflow Automation, System Analysis, Business Process Improvement, Requirements Gathering, Digital Transformation

Professional Experience

Saudi Ground Services (IT Full Stack Developer Intern (Tamheer Program) December 2025 – Present (Expected Completion: June 2026))

- Led the development of a Procurement Request (PR) Workflow System from requirements gathering and system design to implementation, testing, deployment, and user support.
- Developed and enhanced enterprise business systems including PR Workflow, Timekeeper Portal, and FIS applications, supporting operational process automation and digital transformation initiatives.
- Built workflow automation processes, approval systems, reporting dashboards, and role-based functionalities using ASP.NET MVC, SQL Server, JavaScript, and Bootstrap.
- Implemented Excel import/export functionality and automated workflow processes to improve operational efficiency.
- Improved usability and streamlined internal workflows through UI/UX enhancements and user-focused design.
- Designed UI/UX prototypes and workflow plans for Flynas digitization initiatives.
- Collaborated with development teams using Git and Azure DevOps throughout the software development lifecycle.
- Participated in testing, debugging, database management, and continuous enhancement of enterprise applications.

Finpal (IT & Cybersecurity Intern Jeddah, Saudi Arabia June 2024 – July 2024)

- Assisted in IT support and cybersecurity operations.
- Participated in system monitoring, incident handling, and technical support activities.
- Gained practical exposure to IT infrastructure, information security practices, and enterprise technologies.

Academic Projects

Qoot – Smart Fridge System (Python, OpenCV, Firebase, Flutter (Senior Project))

- Developed an AI-powered smart fridge system using Raspberry Pi and computer vision technologies.
- Implemented food inventory management and expiry-date tracking features.
- Integrated mobile application functionality for monitoring inventory and receiving notifications.

Key Skills: Python, OpenCV, Firebase, Flutter, Computer Vision, IoT

Saudi Vacation Platform (Java)

- Developed a tourism and booking platform featuring hotel, restaurant, and reservation management functionalities.
- Applied Agile development methodologies throughout the project lifecycle.

Key Skills: Java, Object-Oriented Programming (OOP), Database Design, Agile

HelpConnect – Support Application (Figma, Adobe XD)

- Designed a customer support application featuring ticket management and live chat capabilities.
- Created user-centered UI/UX workflows, wireframes, and interactive prototypes.

Key Skills: UI/UX Design, Figma, Adobe XD, Prototyping, User Research

Soft Skills

- Problem Solving
- Communication
- Teamwork & Collaboration
- Adaptability
- Critical Thinking
- Time Management
