Databases: SQL Server, MySQL, Database Design and Management

Business and Automation: Power Automate, Power BI, Microsoft Office

Development Tools: Azure DevOps, Git, Visual Studio

UI/UX Design: Figma, Adobe XD, Wireframing, Prototyping

SOFT SKILLS

Problem Solving, Communication, Teamwork and Collaboration, Adaptability, Critical Thinking, Time Management

PROFESSIONAL EXPERIENCE

Saudi Ground Services (SGS) — Jeddah, Saudi Arabia

IT Full Stack Developer – Seasonal Contract | Sep 2026 – Present

- Developed a guest transportation request portal, delivering the first functional version within three months with role-based workflows, SSO, automated notifications, and security enhancements.
- Developed the Crew Transportation System, building backend APIs and a multi-level approval workflow using Node.js, Express, Sequelize, and SQL Server.
- Supported system testing, security remediation, and deployment readiness.

IT Full Stack Developer – Tamheer Program | Dec 2025 – Jun 2026

- Built the Procurement Request (PR) Portal end to end, replacing manual email approvals with a centralized workflow.
- Improved the UI/UX of the Timekeeper Portal and FIS, and added Excel bulk upload to Timekeeper.
- Contributed to the initial planning and designed the UI/UX prototype for an operational digitization initiative.

Finpa — Jeddah, Saudi Arabia

IT and Cybersecurity Intern (COOP) \une 2024 - July 2024

- Assisted in IT support and cybersecurity operations, including system monitoring and incident handling.
- Gained practical exposure to IT infrastructure, information security practices, and enterprise technologies.

ACADEMIC PROJECTS

Qoot - Smart Fridge System (Senior Project) - *Python, OpenCV, Firebase, Flutter*

- Developed an AI-powered smart fridge system using Raspberry Pi and computer vision for food inventory management and expiry-date tracking.
- Built a companion mobile app for monitoring inventory and receiving expiry notifications.

Saudi Vacation Platform - *Java, OOP, Agile*

- Developed a tourism and booking platform with hotel, restaurant, and reservation management features, using Agile methodology.

HelpConnect - Support Application - *Figma, Adobe XD*

- Designed a customer support application with ticket management and live chat, including user research, wireframes, and interactive prototypes.
